

Hi, There !

I'm Navaneeth Vijay

I'm a Full Stack web developer specializing in Node.js and Adobe Commerce with over 6+ years of experience. I'm passionate about creating robust, user-focused websites that solve real-world problems. Plus, I have a wonderful German Shepherd named Bailey! :")

AWS services (EC2, Load Balancers, S3)

Docker

Nginx

Linux

Certification

[Adobe Certified Expert Front-End Developer - Credly](#)

Professional Experience

Codilar Technologies Pvt. Ltd.

Tech Lead – Adobe Commerce Developer | 2018 – Present, Bengaluru

In 6+ years, I crafted top-tier e-commerce web applications, utilizing advanced technologies and backend integration. My role also involved overseeing data interaction and mentoring the development team.

- Building high performance PWA e-commerce applications using Scandipwa, NextJS for frontend & using Magento as data source.
- Providing technical solutions to business specific requirements.
- Assisting in resolving critical production issues and ensuring smooth release of sprint tasks.
- CI/CD and automation using GitHub Actions
- Implement and enforce testing strategies, including unit, integration, and end-to-end tests.
- Designing REST APIs for third-party vendors and developing/ managing GraphQL endpoints for seamless application interaction.
- Creating and maintaining technical documentation for future reference.
- Effective code review and quality assurance during the delivery.
- Training freshers and upscaling team members

Self work & Open Source contributions

- [backstopjs-ui](#)
Automated visual regression testing that generates reports and deploys on vercel
- [magento2-sass-tailwindcss-theme](#)
Magento 2 sass based theme with tailwindCSS configuration
- [squosh-server](#)
This project focuses on optimizing images for your projects, drawing inspiration from Next.js. It utilizes Squoosh by GoogleChromeLabs under the hood.
